# Building an Effective Security Program for Distributed Energy Resources

Distributed energy resources (DERs) are an increasingly important part of the modern energy landscape. They offer a number of benefits, including reduced costs, increased efficiency, and improved resilience. However, DERs also present a number of security challenges.

Cyberattacks on DERs can disrupt their operation, damage equipment, and even cause physical harm. In Free Download to protect DERs from these threats, it is essential to develop and implement a comprehensive security program.
