

# Interviews at the Institute for Mathematical Sciences, National University of Singapore

In recent years, IMS has launched a new initiative to interview leading mathematicians who have visited the institute. These interviews provide a unique opportunity to learn about the mathematicians' work, their thoughts on the future of mathematics, and their advice for young mathematicians.

The interviews are conducted by IMS staff and students and are published on the IMS website. The interviews are a valuable resource for anyone interested in mathematics, from students to researchers.

Here is a list of some of the mathematicians who have been interviewed by IMS:

## Art And Practice Of Mathematics, The: Interviews At The Institute For Mathematical Sciences, National University Of Singapore, 2010-2024

- **Edward Frenkel** is a professor of mathematics at the University of California, Berkeley. He is known for his work on Langlands duality and the geometric Langlands program.
- **Simon Donaldson** is a professor of mathematics at the University of Oxford. He is known for his work on differential geometry and topology.
- **Cédric Villani** is a professor of mathematics at the University of Lyon. He is known for his work on partial differential equations and optimal transport.
- **Elon Lindenstrauss** is a professor of mathematics at the Hebrew University of Jerusalem. He is known for his work on ergodic theory and number theory.
- **Caucher Birkar** is a professor of mathematics at the University of Cambridge. He is known for his work on algebraic geometry.

The interviews with these mathematicians are a fascinating glimpse into the minds of some of the world's leading thinkers. The interviews are full of insights into the nature of mathematics, the challenges facing mathematics today, and the future of mathematics.

If you are interested in mathematics, I encourage you to read the interviews with these leading mathematicians. You will learn a lot about mathematics and the people who are shaping its future.
